 2. Type in the cheat
 3. Press enter again.

Spooky: In multiplayer, gives all players except you full health

Stone: All staves fully charged

Weird: All weapons give +1 hit

Supernatural: Hear a scream

To Duplicate An Item In Your Inventory

1. Drop the item you want to duplicate on the ground. You can duplicate any item, including money.
2. Place a potion on your belt. Important: Make sure the inventory window is closed before you continue.
3. Walk a short distance away from the item on the ground.
4. Click the item on the ground. As you begin walking towards the item, position the hand cursor over the potion in your belt.
5. At the exact instant you pick up the item, click the potion on your belt. Timing is critical, so you may have to try several times to get it right. If you're successful, the original item will be placed in your inventory and the potion will become a duplicate of the item. Although the potion still appears as a potion, the description changes to the name of the duplicated item. Once you drop the potion into your inventory, it becomes the duplicated item. Note: If you drop two copies of an item on the ground, one will be destroyed.

Another Way To Duplicate An Item In Your Inventory

1. Create a Town Portal.
2. Drop the item you want to duplicate in front of the portal.
3. Click the item, then step through the portal. You should have a copy of the item when you reach the town.
4. Go back through the portal to retrieve the original item.

Note: These cheats may not work in all version of Diablo.
