

Neon Tango

A Survival Guide to the Geometric Onslaught

Requirements

OS X 10.3.9 or Higher
800 MHz G4, G5 or Intel
512 MB of RAM
32 MB of Video RAM
500 MB of Hard Drive space

Recommended
1.6 GHz G5 or Any Intel Mac
1 GB of RAM
64 MB of Video RAM (or GMA)
1 GB of Hard Drive space

Step 1. Install Neon Tango

Copy the [Neon Tango] Folder to your Hard Drive. It is suggested you use the Applications folder, but any will do.

Step 2. Register Neon Tango

To aid in the fight against Geometric shapes, it is highly recommended you purchase and register Neon Tango. To do so, Click on the [Enter Code] Button on the registration screen. Enter your name, email address and registration code.

*If at any time you move to a new computer, you will need to enter your registration code again. If you lose your code, simply click on [Enter Code] button, enter your name and email address and click [Lost Code].

Once registered, you will have access to all 50 levels.

Step 3. Create a Profile

Neon Tango uses the powerful StatSmith online high score system.

Using internet high scores is easy to do. When you first play Neon Tango, it will ask you to make a profile. Enter your desired user name, your email address and a secret password so you can log in.

Ensure the [Use Internet High Scores] check box is checked.

If you already have an account (such as from another game like Kill Monty or SimStapler Arena) enter your name, email address and your password and press Create.

Your internet high score account can follow you from game to game.

Step 4. Shoot Everything!™

Use your arrow keys to steer left and right. Press the [space bar] to fire your main weapon. Hold down [option] to charge your secondary weapon.

Press and hold [Up] to accelerate, Press and hold [Down] to strafe left and right.

Press [Z] and [C] to cycle goodies left and right, press [X] to use the selected goodie.

You can change these options at any time from the Main menu.

Step 5. Trouble Shooting (Trouble Shoot Everything!™)

To adjust video options, hold down the [Option] key when starting Neon Tango.

On older hardware, the game might run slow. In the main menu click on [Option] then [Settings] then [General] and adjust the levels of the graphics. Reducing the number of particles on screen can greatly speed the game up.
